

Job Description

Compressor Mechanic

Position Summary

Mechanic A is responsible for performing Mechanical maintenance duties such as operating, troubleshooting, diagnosing, and company-owned prime movers and rotating equipment at the Iron Horse Midstream Compressor Stations near Union City, Minco, Amber, and Chickasha, OK.

Qualifications

- High school diploma or GED equivalent.
- 5+ years of experience in natural gas facility and rotating equipment maintenance.
- Proven experience with Caterpillar 3600 ULB engines and Ariel compressor frames.
- Proficiency in using diagnostic software and precision tools.
- Strong organizational skills and ability to work with minimal supervision.
- Excellent written and verbal communication skills in English.
- Valid driver's license and a good driving record.
- Must pass a pre-employment drug screen and remain subject to random drug testing.
- Must pass a pre-employment background check.
- Experience with the repair, alignment, and replacement of various pumps, fans, and motors.
- Ability to perform duties and handle tasks under potentially stressful conditions.
- Physical ability to stand, walk for prolonged periods, bend, reach above shoulder height, and lift heavy objects.
- Knowledge of safety and operations within natural gas plants.
- Flexibility to work various schedules, including shift work, overtime, and on-call.
- Product knowledge of gas, diesel, electrical, electronic, and mechanical components.

Responsibilities

- Promote company policies and procedures to ensure a safe and professional work environment.
- Inspect engines, compressors, and mechanical equipment to diagnose problems.
- Perform independent mechanical inspections, repairs, and routine preventative maintenance.
- Overhaul, repair, and adjust engines, compressors, pumps, and motors.
- Maintain and repair ignition, fuel, and emissions control systems.
- Maintain compressor logs, diaries, and an oil sampling program.
- Manage inventories of parts, equipment, lubricants, and coolants.
- General upkeep of facilities and equipment, including engines/compressors, vehicles, and the shop.
- Demonstrate sound technical and professional judgment.
- Make decisions and corrections when problems are detected.
- Complete essential tuning functions to adjust engine and heater performance.
- Coordinate with crane and rigging services for maintenance support.
